How to Use Cotton Candy Vending Machine

Check the Machine:

Ensure the machine is clean and properly set up. Make sure it's plugged in and that all components are in place.

Fill the Sugar Hopper:

Open the sugar hopper and fill it with cotton candy sugar. You can use pre-packaged flavored sugars for various tastes.

Turn on the Machine:

Power on the machine using the main switch. Allow it to warm up for a few minutes until it reaches the proper temperature for spinning.

Select the Flavor (if applicable):

If the machine has a flavor selection feature, choose the desired flavor of cotton candy.

Position the Cone:

Place a cotton candy cone or stick into the designated holder. Ensure it's securely in place to catch the spun sugar.

Start the Spinning Process:

Press the button or switch to start the spinning process. Sugar will begin to melt and spin out into fine strands.

Collect the Cotton Candy:

As the cotton candy begins to form, rotate the cone in a circular motion to collect the strands evenly. Continue until you have the desired amount.

Turn Off the Machine:

Once you've collected enough cotton candy, turn off the machine. Allow it to cool down before cleaning.

Clean the Machine:

After use, clean the machine according to the manufacturer's instructions. This typically involves wiping down surfaces and removing any leftover sugar.

Tips for Best Results

Use the Right Sugar: Always use sugar specifically designed for cotton candy machines for the best flavor and texture.

Don't Overfill: Avoid overfilling the hopper to prevent clogging and ensure smooth operation.

Keep it Clean: Regular maintenance and cleaning will ensure the machine operates effectively and lasts longer.
